

# PETITION - Citizens Supporting Wyoming Coal

*To be delivered to Governor Mark Gordon, all State Legislators, the Wyoming Congressional Delegation, and to President Donald Trump. CSWCOG 301 Thelma Dr. #252 Casper, Wy 82609-2325*

**Whereas** the State of Wyoming has benefited greatly, in the tens of billions of dollars from the coal industry and now the families that are employed by this industry are suffering due to lack of action!

**Whereas** Governor Mark Gordon vetoed legislation in 2019 that would have funded a legal battle against blocked shipping corridors and ports!

**Whereas** the majority of elected lawmakers continue to delegate their powers to regulatory bureaucracies with far overreaching authority!

I \_\_\_\_\_ sign this petition in protest...  
(Print First Name) (Print Last Name)

...to what is being allowed by Lawmakers that have been entrusted with the powers that are inherent in the people as promised in the State and U.S. Constitutions.

As a citizen of Wyoming, I demand that my elected officials to stop turning their cheeks and instead fight using any and all means possible to reign in the expansive executive authority by:

**Defunding** any government entity that uses its authority to block shipping corridors and ports.

**Defunding** any bureaucracy that regulates the coal industry with its heavy hand.

**Defunding** all quasi-government agencies that are complicit with the environmentalist's anti-coal agenda.

**Defunding** all grants and government funding where anti-coal Non-Government-Organizations benefit in any manner.

All mentioned have used monies taken from the heavily regulated coal industry to further enshackle it.

**The time is NOW to open the shipping lanes and ports!**
